

# Diamond Packaging

Diamond Packaging has purchased wind-generated Renewable Energy Certificates to offset 100% of their electricity usage.

This commitment will allow 12,052,000 kWh of wind energy to enter into the national electricity grid from October 2009 until October 2011.

This purchase makes a difference for the environment and promotes our nation's energy independence. The estimated environmental benefit is equivalent to planting about 6,500 acres of trees or not driving over 16.7 million miles over 2 years.

The Renewable Energy Certificates are supplied by leading wind energy marketer and developer Community Energy.
